Lines 500 & 510 - Service Quality Standards and Consumer Protection Rules Compliance

As required in 47 C.F.R. § 54.313(a)(5) for High-cost Recipients, the following is a detailed description of how the Company complies with Service Quality Standards and Consumer Protection Rules.

In establishing this certification in its *2005 ETC Order*,¹ the FCC found that an ETC must make “a specific commitment to objective measures to protect consumers.”² The FCC found that for wireless ETCs, compliance with CTIA’s Consumer Code for Wireless Service would satisfy this requirement” and that the sufficiency of other commitments would be considered on a case-by-case basis.³ In this context, the FCC stated, “to the extent a wireline or wireless ETC applicant is subject to consumer protection obligations under state law, compliance with such laws may meet our requirement.”⁴

The Company complies with all applicable service quality standards and consumer protection rules established by the Arkansas Public Service Commission and detailed in the Telecommunication Provider Rules. Specifically, sections 1.09, 1.10, 1.11, 1.12, and 2.0 address the following obligations which include, but are not limited to: 1.09 Service Availability, 1.10 Safe and Adequate Service, 1.11 Construction Standards, 1.12 Facility Identification and Section 2.0, which details consumer billing rules and regulations. Furthermore, Company is subject to cyclical compliance reviews by the Arkansas Public Service Commission Telecommunications Utilities and Quality of Service Section. As such, the Company believes it is in compliance with industry service quality standards. The above referenced Arkansas Telecommunications Providers Rules are attached for your reference.

In addition, the Company complies with numerous federal consumer protection standards including, but not limited to: (1) Truth-in-Billing Rules outlined in 47 CFR § 64.2401; and (2) compliance with Federal CPNI rules, Red Flag Rules and other applicable federal and state requirements governing the protection of customers’ privacy. The Company has developed and implemented a Customer Proprietary Network Information (“CPNI”) Compliance Manual and has appointed a CPNI Compliance Officer and a Red Flag Compliance Officer. Annually, the Company requires all employees to attend training on the CPNI Compliance Manual and Red Flag Rules and they understand that any violation of the Company’s CPNI procedures may result

¹ *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) (“*2005 ETC Order*”).

² *Id.* at para. 28.

³ *Id.* The FCC noted that under the CTIA Consumer Code, wireless carriers agree to: “(1) disclose rates and terms of service to customers; (2) make available maps showing where service is generally available; (3) provide contract terms to customers and confirm changes in service; (4) allow a trial period for new service; (5) provide specific disclosures in advertising; (6) separately identify carrier charges from taxes on billing statements; (7) provide customers the right to terminate service for changes to contract terms; (8) provide ready access to customer service; (9) promptly respond to consumer inquiries and complaints received from government agencies; and (10) abide by policies for protection of consumer privacy.” *Id.* at n. 71.

in disciplinary action up to and including dismissal. The Company files an annual report with the Federal Communications Commission ("FCC") certifying compliance with the FCC's CPNI rules.

Line 600 and 610 – Functionality in Emergency Situations

As required in 47 C.F.R. § 54.313(a)(6) for all high cost recipients, which includes the Company, and as set forth in 47 C.F.R. § 54.202(a)(2), the following provides a detailed description demonstrating that the Company has the ability to remain functional in emergency situations.

OVERALL RESPONSE TO EMERGENCY SITUATIONS: The Company has a comprehensive disaster recovery plan that was developed and implemented for the Company specifically to deal with emergencies. It has detailed, specific steps that are to be taken for each type of emergency.

POWER: In order to function in an emergency, the Company has a combination of batteries and emergency generators. All central offices, remote offices, and remote cabinets have batteries that would provide at least eight hours of service. Each central office and remote office is also equipped with permanent emergency generators with their own fuel tanks. Automatic transfer switches are installed in each of the buildings that will start the generators and transfer from commercial power to the backup generator until commercial power is restored. Each building and cabinet is also wired for a portable generator connection. The company owns portable generators that technicians can utilize to recharge the batteries on the remote digital loop carrier cabinets or with the building connections if needed. Generators are started and tested once a month with technicians documenting the results.

REROUTING TRAFFIC AND REDUNDANCY: The Company's transmission link is equipped with redundant hardware between the host office in Lead Hill, AR, and the Windstream tandem switch located in Harrison, AR. We also have a diversified fiber route connecting the two offices.

MANAGING TRAFFIC SPIKES: The Company realizes that when a catastrophe happens, everyone immediately tries to contact friends and family to make certain they are all right. The Company has designed the network to have excess capacity on its backbone network. In case of traffic spikes, NATCO has overflow routing to an alternate long distance VoIP switch.
